ARTICLE I – DEFINITIONS

- 1.1 “Baseline” is generally defined, for the purposes of determining estimated and measured energy savings for equipment replacement projects implemented under the SOP, as the energy consumed by equipment with efficiency levels that meet the applicable current federal standards and reflect current market conditions. The Baseline may be determined by the equipment or conditions currently in place under the following conditions: (a) when federal energy efficiency standards do not apply, or (b) when the existing equipment can be shown by the Project Sponsor to have a remaining service life of at least ten years.
- 1.2 “Deemed Energy Savings” shall mean a pre-determined, validated estimate of Energy Savings attributable to a Measure in a particular type of application.
- 1.3 “Deemed Peak Demand Savings” shall mean a pre-determined, validated estimate of Peak Demand Savings attributable to a Measure in a particular type of.
- 1.4 “Deemed Savings” shall mean the sum of Deemed Energy Savings and Deemed Peak Demand Savings.
- 1.5 “Demand Savings” shall mean a quantifiable reduction in the rate at which energy is delivered to or by a system at a given instance, or average over a designated period, usually expressed in kilowatts (kW) or megawatts (MW).
- 1.6 “Energy Savings” shall mean a quantifiable reduction in a customer’s consumption of energy, or the amount by which a customer’s energy consumption is reduced, as a result of the installation of qualifying energy efficient Measures. Energy Savings will be determined by comparing the efficiency of the installed Measures to that of an appropriate Baseline.
- 1.7 “Host Customer” shall mean a Residential Customer of SWEPCO that (i) owns or leases facilities at a Project Site or Sites, and (ii) has entered into a Host Customer Agreement and Acknowledgement with Project Sponsor for the installation of Measures as a part of the Project.
- 1.8 “Host Customer Agreement and Acknowledgement” shall mean the agreement between Host Customer and Project Sponsor that specifies the rights and obligations of each party with respect to the installation of the Measures at the Project Site and other related and/or unrelated matters.

- 1.11 “Measure” shall mean new equipment, material, or systems that, when installed and used at a Project Site, result in a measurable and verifiable reduction in either purchased electric energy consumption, measured in kilowatt-hours (kWh), or peak demand, measured in kilowatts (kW), or both. Measures shall improve the electrical efficiency of existing and ongoing electricity-consuming end uses which meet the requirements of the Contract Documents.
- 1.12 “PUCT” shall mean the Public Utility Commission of Texas.
- 1.13 “Peak Demand” shall mean electrical demand at the time of highest annual demand on the utility’s system, measured in 15-minute intervals.
- 1.14 “Peak Demand Savings” shall mean, for purposes of the SOP, the maximum average load reduction occurring during any one-hour period between 1 PM and 7 PM CDT weekdays, from June 1 through September 30 (federal holidays excluded). Peak Demand Savings will be determined by comparing the efficiency of the installed Measures to that of an appropriate Baseline.
- 1.15 “Project” shall mean the sum of all activities and Measures required to reduce energy costs and achieve the Estimated Energy Savings and Estimated Peak Demand Savings necessary to meet the incentive amount included in the Project Sponsor’s application.

- 1.16 "Project Site" shall mean the location of a Host Customer's facilities where approved Measures will be installed and from which Peak Demand Savings or Energy Savings, or both, will be obtained. A single Project may include Measures installed at multiple Project Sites.
- 1.17 "Project Sponsor" shall mean any organization, group, or individual who contracts with SWEPCO to provide Energy Savings or Peak Demand Savings, or both, under the SOP.
- 1.18 "Prudent Electrical Practices" shall mean those practices, methods, standards and equipment commonly used in prudent electrical engineering and operations to operate electrical equipment lawfully and with safety, dependability and efficiency, and in accordance with the National Electrical Safety Code, the National Electrical Code and any other applicable federal, state and local codes provided, however, that in the event of a conflict, the applicable federal, state or local code shall govern.
